

# Research Volunteers Needed!

Washington University School of Medicine in St. Louis is conducting a study on Protein and Imaging Biomarkers in Parkinson Disease.

## WHAT IS THE PURPOSE OF THE STUDY?

To evaluate the relationship between clinical symptoms and brain changes in people with PD as compared to healthy controls without PD.

## TESTS/PROCEDURES:

MRI scan; neurological exam; walking exercises; questionnaires; cognitive testing; interview to evaluate your thinking and memory; lumbar puncture (*optional*); PET scans

## WHAT IS INVOLVED IF I PARTICIPATE?

Your participation will involve an in-office visit lasting about 12 hours over 2 separate days. You will be asked to come back for a follow up visit every three years. You are also being asked to donate your brain for this research after your passing.

## WHO IS NEEDED?

- ♀ Females diagnosed with Parkinson Disease
- ♂ Male healthy controls with no family history of movement disorders

We particularly want to encourage any under-represented minority person to participate in our study to ensure that the results of our study apply to everyone in the community.

## COMPENSATION:

Volunteers are provided lunch and will be compensated \$50-300 for their time. Lodging can be provided for out of town volunteers.

## WHERE WILL THE STUDY TAKE PLACE?

Washington University School of Medicine  
517 S. Euclid Ave  
St. Louis MO. 63110
