

# Do you have Parkinson's disease?

*Help us learn  
more about how  
Parkinson's disease  
affects your life*

UNLV researchers are seeking people who have Parkinson's disease for a survey study on how Parkinson's disease affects physical activity, habits, mood, thinking, and other behaviors. Responses from this survey will be used to help plan research studies for people with Parkinson's disease.

Your participation in this study is greatly needed as it will help us plan out research studies that are relevant to you. This survey will take between 45-60 minutes to complete.

No personal identifying information will be included in the study unless you wish to be entered into a raffle for a monetary award.

**To participate, follow the link  
or Scan the QR Code:**
